Prospective investors should carefully consider all the information in the Red Herring Prospectus, particularly the “**Financial Information of the Company**” and the related notes, “**Our Business**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” on page 166, 108 and 209 respectively of this Red Herring Prospectus and the risks and uncertainties described below, before making a decision to invest in our Equity Shares.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Red Herring Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Red Herring Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. INTERNAL RISK FACTORS

1. **We are heavily dependent on third party service providers and suppliers to effectively carry on our logistics operations. Any deficiency in services provided by them or failure to maintain relationships with them could result in disruption in our operations, which could have an adverse effect on our business, financial condition, results of operations and cash flows.**

We rely on commercial ocean freight carriers and NVOCC for the shipment of our client’s cargo from one port to another. Apart from this we are also dependent on CHA agents for custom clearance and upon various third parties for supply of assets and services, which inter-alia includes, vehicles for inland transportation of goods, containers for carrying goods, warehouses for storage etc. Our ability to service our customers depends on the availability and continuous services of such third parties for these outsourced services. Events beyond our control or that of our suppliers such as (i) equipment and vehicles shortages, particularly among contracted truckload carriers and ocean carriers; (ii) interruptions or stoppages in transportation services as a result of labor disputes and strikes; (iii) network congestion, weather related issues, “Acts of God” or acts of terrorism; and (iv) increases in operating expenses for carriers, such as fuel

costs, insurance premiums and licensing expenses; may affect the cost, availability or ability to provide their services. We have limited control and supervision over these service providers, and there can be no assurance that we will be able to obtain access to preferred suppliers and third parties for our warehouses, vehicles, ocean carriers or equipment needs, or at attractive rates or that these suppliers and third parties will have adequate available capacity to meet our needs or be able to meet our requirements in a timely manner.

Further, we rely on limited number of suppliers/partners for procurement of these services. Our service cost from top 5 suppliers contributed to approximately 45.50%, 38.07%, 36.64% and 21.92%, as a percentage of our total revenue for period September 30, 2023 and in Fiscal 2023, Fiscal 2022 and Fiscal 2021 respectively. We do not have long term agreements with any of these service providers/partners, any discontinuation of such supply or a failure of these suppliers to adhere to the delivery schedule could hamper our business and results of operations

If we fail to maintain relationships with these service providers, or if we are unable to secure sufficient spaces, equipment or other transportation or delivery services to meet our commitments to our customers or provide our services on competitive terms, our customers could shift their business to our competitors or other third-party service providers, temporarily or permanently, and our business and results of operations could be materially and adversely affected.

2. Our logistic and freight business is largely dependent on our customers engaged in the business of manufacturing and export of yarn and yarn commodities, any adverse impact on the yarn industry may have an adverse effect on our results of operations and financial condition.

Majority of our revenues are dependent on the export of yarn and yarn commodities. For the period September 30, 2023 and during the fiscal 2023, 2022 and 2021 we derived approximately 47.20%, 68.19%, 74.65% and 58.80% of our revenue from providing logistics services to the customers engaged in yarn business. In case of any slowdown in the yarn and related commodities, we may face disruption in our logistic and freight forwarding business. If there is any slowdown in the industry it may lead to reduction in orders from the customers, delay or re-schedule of the delivery commitments and delay or defaults in payments from the customers. Thus, in case there is any slowdown in the yarn and yarn commodities industry it may have an adverse effect on our business, revenue and results of operations.

3. Our Company does not have Custom House Agent license.

We do not have any Custom House Agent license in our name which is used for clearance of cargo at entry or departure of a conveyance or the import or export of goods at any Customs Station. We have over the years make firm arrangements with CHA agents to undertake the custom clearance services on our behalf. Thus, we don't have Custom House agent license in our own name and have to rely on third parties for Custom House Agent Services. Any delay in the service or refusal of services by Custom House Agency may affect delivery of our goods and we may have to compensate our customers for the loss if any. Further, all the licenses issued by the government authorities are issued for fixed period of time and the license holders are required to fulfil certain condition for renewal of the license. In case of any action being taken by the government authorities against the CHA agents or non-renewal of the license by them, may delay the custom clearance process or require us to arrange for any alternate solution for the getting cargo custom cleared. Any such event may affect our result of operations and future prospects of our business.

4. Our long-term growth and competitiveness are dependent on our ability to control costs and pass on any increase in operating expenses to customers, while continuing to offer competitive pricing.

To maintain competitive pricing and enhance our profit margins, we must continuously control our costs. Shipping freight expense, line charge expenses, custom & clearing charges and vehicle rental expenses represent some of our most significant recurring operating costs and an increase in such costs or an inability to pass on some or all of such increase to our customers will adversely affect our results of operations and cash flows. For instance, the cost of fuel has increased in recent years and fluctuates significantly due to various factors beyond our control, including, international prices of crude oil and petroleum products, global and regional demand and supply conditions, geopolitical uncertainties, import cost of crude oil, domestic taxes, government policies and regulations and availability of alternative fuels. Our transportation partners may raise their service fees in response to increases in fuel cost. Furthermore, the GoI may implement new laws or other regulations and policies that could affect the logistics industry in general, including requiring additional approvals or licenses, imposing additional restrictions on our or our third-party network partners' operations or tightening the enforcement of existing or new laws or regulations, any of which could require us to incur additional expenses to comply with such laws and regulations. If we suffer any increases in expenses and are unable to pass on such increase to our customers, our operating margins, and consequently, our business and profitability may be adversely affected.

In the event of a significant increase in our operating costs, whether as a result of increases in fuel prices, third-party transportation service charges, rent or other costs, our profitability may decrease if we are unable to adopt effective cost control-measures or pass on

incremental costs to our customers. We may not be able to immediately pass on any short-term increases in service fees charged by our network partners, fleet partners to our customers.

5. *Our Company may not be able to deliver the cargo on timely basis due to which we could become liable to claims by our customers, suffer adverse publicity and incur substantial cost as result of deficiency in our service which could adversely affect our results of operations.*

The timely delivery of the cargo at the destination is very crucial in our business. But, there can be event which may be beyond our control which could lead to delay in the transportation of the cargo to the customer destination. In some cases, we are also dependent on third parties to provide logistics services which may also lead to delay due to non-availability of the space or right mode of transport which may hamper the delivery schedules to the client and have an adverse effect on our revenue and cause claims to be initiated against us by the customers. Any failure or defect in service or breach of any such terms laid by our customers could result in a claim against the Company for substantial damages, regardless of our responsibility for such failures. A successful assertion of one or more large claim(s) against us by our clients or the imposition of demurrage, could adversely affect our financial condition and results of operations.

6. *Breakdown, mishaps or accidents could result in a loss or slowdown in operations and could also cause damage to life and property.*

The services provided by our company are subject to operating risks, including but not limited to breakdown of the vehicles or accidents & mishaps which could impair our service providing capabilities. Though we take all the possible measure to reduce the risk of any such breakdown but there may be events which may be beyond our control. While, till date, there have not been any notable incidents involving mishaps or major accidents, we cannot assure that these may not occur in the future. Further, we rely on third party service providers like airline carriers, shipline and other service providers and any mishaps or accidents happening with these service providers may also adversely affect our operations. Any consequential losses arising due to such events will affect our operations and financial condition. Consequently, we may be held liable for losses due to damage to our customers' products. Any breach of our obligations may result in termination of our contracts with our customers, which could have an adverse effect on our business, reputation and financial results. Further, we may also be open to public liability from the end consumer for defects in the quality of perishable products we store and transport. Accordingly, any breakdown of our machinery or equipment may have a significant effect on our business, reputation, financial results and growth.

7. *Any disruptions which affect our ability to utilize the transportation network in an uninterrupted manner could result in delays, additional costs or a loss of reputation or profitability.*

With a significant portion of the goods being transported by road and sea, our business operations are dependent on the road and sea network. Certain factors which could adversely affect such transport modes and result in delays, additional costs or unreliability include bad weather conditions, natural calamities, port maintenance, time-consuming and complex inter-state travel, political unrest, regional disturbances, fatigue or improper conduct of drivers, accidents and third party negligence. We cannot assure you that these factors and conditions will not affect our supply chain and logistics schedules or our ability to operate without disruption. Any such interruptions or disruptions could cause delays in the delivery of our clients' consignments to their destination, or cause damage to the transported goods. Any of these consequences may result in claims for compensation from our clients. Further, such delays or damages may cause a loss of reputation which, over a period of time, could lead to a decline in our business operations. Any prolonged or significant downtime of, or damage to, our business partners' fleet of vehicles or other related equipment operated for us may cause disruptions to our operations. If any of these risks materialize, our business, operations, financial condition and results of operations may be materially and adversely affected.

8. *Our business operations depend on our ability to generate sufficient volumes to achieve acceptable profit margins or avoid losses.*

Our business operations are dependent on the availability of sufficient volumes to achieve acceptable margins and avoid losses. The fixed costs do not vary significantly with variations in transportation volumes, and a relatively small change in transportation volumes or the prices we charge to our customers can have a significant effect on our results of operations. Further, difficulties with internal processes or other external adverse influences could lead to shortfalls in revenue. As a result, the success of our business depends on our ability to optimise transportation volumes and revenues. If we are unable to succeed sufficiently at these tasks, we may not be able to achieve acceptable operating or net profit margins, and our business, results of operations and financial conditions could be adversely affected.

9. *We have recently entered into the business of warehousing and may face several risks associated with the new venture, which could hamper our growth, cash flows and business and financial condition.*

We have entered into a letter of intent dated September 27, 2023 for obtaining premises on lease located at K-Square Logistics Park, Prakhhyat Land Developers Private Ltd, Warehouse Building No. 3B, Near Padgha Toll Naka, on Mumbai -Nashik Highway, Tal – Bhiwandi, Dist – Thane to be used as warehouse of the company. The proposed warehouse of the company is spread over an area of 38910 sq. fts. When entering to new business ventures, we may encounter cost overruns or delays for various reasons, including, but not limited to, delays in receiving governmental, statutory and other regulatory approvals and permits. Further, there may be scenarios where, we may not be able to generate sufficient cash flows as anticipated by our company, due to which our business and results of operations may be adversely affected. Any of the foregoing factors could undermine our future plans and hamper our growth and could adversely affect our business, financial condition and results of operations.

10. The restated consolidated financial statements have been provided by peer reviewed chartered accountants who is not statutory auditor of our Company.

The restated consolidated financial statements of our Company for the period September 30, 2023 and for the financial year ended March 31, 2023 and restated standalone financial statement for the financial year March 31, 2022 and 2021 has been provided by a peer reviewed chartered accountants who is not statutory auditor of our Company because of certain pre-occupation of our statutory auditor. Our statutory auditor also holds valid peer review certificate but we have appointed another peer reviewed firm for preparation of the restated financial of our company.

11. We are also engaged in the business of ODC, heavy lift transportation and project cargo. In case of non-identification of efficient method of transporting or not obtaining statutory permissions in this regard, our operations and profitability could be adversely affected.

Over dimension cargos (ODCs), bulk break projects or heavy lift transportation is also one of the services provided by our Company, which inter alia include route survey, equipment analysis required for transportation and obtaining statutory permissions before the cargo is transported. In case of heavy lift transport proper route survey helps us to understand the possible obstacles in the route, ascertaining the best possible route, equipment required for the transportation of the cargo and the necessary permission required from different statutory authorities for moving the cargo. In case the route survey conducted by us is inaccurate, or we are unable to identify another efficient method of transporting, or we fail to obtain statutory permissions, it could lead to time and/or cost overrun and/or failure to meet scheduled timeliness. Also, in case of an inappropriate route being selected may lead to damage to cargo or may require us to find an alternate route which could lead to additional cost being imposed upon us and adversely affect our operations and profitability.

12. We are susceptible to risks relating to fluctuations in currency exchange rates.

We provide international freight forwarding services and derive a small portion of our revenue from international operations. We receive certain portion of our revenue and incur expenses in foreign currency. For instance, our foreign exchange gain/loss for F.Y. 2022-23, F.Y. 2021-22 and F.Y. 2020-21 were Rs. 52.23 lakhs (loss), Rs. 136.00 lakhs (gain) and Rs. 82.43 lakhs (loss) respectively. Any fluctuation in the value of the Indian Rupee against any currency in the currency group will affect our results of operations. We currently do not use any foreign exchange hedging contracts to manage our exchange rate risk. We cannot guarantee that we will not experience foreign exchange losses going forward and that such losses will not adversely affect our business, financial condition or results of operations.

Further, we currently do not use any foreign exchange hedging contracts to manage our exchange rate risk. Although we may, in the future, enter into such foreign exchange hedging contracts, we cannot assure you that such hedges will be available or commercially viable or effective to hedge our exposure to foreign currency risks. In addition, the policies of the RBI may also change from time to time, which may limit our ability to effectively hedge our foreign currency exposures and may adversely affect our reported revenues and financial results. We cannot guarantee that we will not experience foreign exchange losses going forward and that such losses will not adversely affect our business, financial condition or results of operations.

13. Substantial portion of our revenues has been dependent upon few customers. The loss of any one or more of our major customer would have a material adverse effect on our business, cash flows, results of operations and financial condition.

During the stub period for September 30, 2023 and for the Fiscals 2023, 2022 and 2021, our top 10 clients contributed 68.54%, 42.53%, 45.11% and 36.61% respectively, to the total revenue from operations. Our revenues may be adversely affected if there is an adverse change in any of our clients' supply chain strategies or a reduction in their outsourcing of logistics operations, or if our clients decide to choose our competitors over us or if there is a significant reduction in the volume of our business with such clients.

A decline in our clients' business performance may lead to a corresponding decrease in demand for our services. Furthermore, the volume of work performed for these clients may vary from period to period and we may not be the exclusive external logistics service provider for our clients. Our service contracts with our clients are generally subject to periodic renewal and related negotiations. Our reliance on a select group of clients may also constrain our ability to negotiate these agreements. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future.

Further, the sales volume may vary due to our customers' attempts to manage their logistics need either by themselves or through our competitors, which could reduce our sales and adversely affect our business, cash flows, results of operations and financial condition. In addition, we are exposed to payment delays and/or defaults by our major customers and our financial position and financial performance are dependent on the creditworthiness of our customers. There is no guarantee that all or any of our customers will honor their outstanding amounts in time and whether they will be able to fulfill their obligations, due to any financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur from all or any of our major customer, our financial performance and our operating cash flows may be adversely affected.

A loss of any of our significant clients, a decrease in the volume of work our clients outsource to us or a decline in our prices may materially and adversely affect our business, operations, financial condition, results of operations and prospects.

14. We are exposed to the risk of delays or non-payment by our clients and other counterparties, which may also result in cash flow mismatches.

We are exposed to counterparty credit risk in the usual course of our business dealings with our clients or other counterparties who may delay or fail to make payments or perform their other contractual obligations. As at September 30, 2023, March 31, 2023, 2022 & 2021, there were outstanding trade receivables of Rs. 5559.95 lakhs, Rs. 4836.90 lakhs, Rs. 4096.08 lakhs and Rs. 3968.96 lakhs, respectively, of which Rs. 312.92 lakhs, Rs. 601.55 lakhs, Rs. 204.47 lakhs and Rs. 166.33 lakhs, respectively, represents due outstanding for over one year. We also provide advances to our business partners and suppliers, of which Rs. 3033.82 lakhs which remained outstanding as at September 30, 2023. The financial condition of our clients, business partners, suppliers and other counterparties may be affected by the performance of their business which may be impacted by several factors including general economic conditions. We cannot assure you of the continued viability of our counterparties or that we will accurately assess their creditworthiness. We also cannot assure you that we will be able to collect the whole or any part of any overdue payments. Any material non-payment or non-performance by our clients, business partners, suppliers or other counterparties could adversely affect our financial condition, results of operations and cash flows.

15. Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business and financial conditions.

We have obtained insurance coverage in respect of certain risks related to Cargo Insurance and BL Insurance. However, our insurance policies do not cover the risk in respect of assets located at our registered office and our warehouses. Further, we are not insured against risk arising from cash in transit, loss of profits and keyman insurance, fire, explosion, theft, terrorism, burglary and certain natural disasters in respect of assets located at our offices and warehouse. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. There can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected. Further, in case of any loss or damage to the cargo handled by us, our company may be held liable for the loss or damage. Also, the insurance company may also not honor the claim at all or in full upto the damage required to be paid to customer, such a condition may have an adverse effect on our business and financials.

16. There are certain discrepancies/errors noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 1956/2013. Some of our corporate records are not traceable. Our company has not complied with certain statutory provisions in the past including but not limited to the details as mentioned in this risk factor. There are few discrepancies noticed in some of our corporate records relating to e-forms filed with the Registrar of Companies, which inter-alia includes clerical errors in the annual returns filed by our Company with the ROC in past years, for instance, list of shareholders was not attached in the form 20B for Annual Return filed with ROC in financial year 2012-13. Further, our Company has not filed Form CHG-1 for creation of charge on certain vehicle loans taken in the past, which is non-compliance of section

77 of the Companies Act, 2013 read with rules made thereunder and attracts penalty under section 86 of the Companies Act, 2013. However, no such loans are outstanding as on date of this Red Herring Prospectus. In addition, our company had accepted loans in the past, which is in non-compliance of section 73 of the Companies Act 2013, however, the said loans have been repaid as on date of this Red Herring Prospectus. Further, the share transfer deed (form 7B) in respect to transfer of shares of our Company in the year 2005-06 are not traceable. Accordingly, we have relied on the other corporate records maintained by the Company such as minutes, statutory registers and the forms filed with RoC to ascertain the information for the missing corporate records.

Although, no show cause notice in respect of the above has been received by the Company till date, any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of the Company to that extent.

There can be no assurance that these litigations will be decided in favour of our Company and consequently it may divert the attention of our management and Promoter and waste our corporate resources and we may incur significant expenses in such proceedings and may have to make provisions in our financial statements, which could increase our expenses and liabilities. If such claims are determined against us, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares.

18. Our Company had negative cash flow in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

19. Foreign Trade restrictions could materially and adversely affect our business, financial condition and results of operations.

Our business may be adversely affected by foreign trade restrictions implemented by countries or territories in which our customers are located or in which our customers' products are manufactured or sold. For example, we are subject to risks relating to changes in trade policies, tariff regulations, embargoes, additional import duties, ban of import/ export of certain goods or other trade restrictions which can adversely impact trade volume between countries. Further, there are trade restrictions imposed on sanctioned countries by other countries and international organisations, affecting movement of international cargo. Actions by governments and other authorities and regulators that result in restrictions on movement of cargo or otherwise could also impede our ability to carry out our international freight forwarding operations. In addition, international trade and political issues, tensions and conflicts may cause delays and interruptions to cross-border transportation and result in limitations on our insurance coverage. If we are unable to transport cargo to and from countries with trade restrictions in a timely manner or at all, our business, financial condition and results of operations could be materially and adversely affected.

20. We do not own registered office and other offices from where we carry out our business activities. Any dispute in relation to use of the premises could have a material adverse effect on our business and results of operations.

We have obtained our Registered Office and Warehouses on rental basis. For details on the duration of existing rent agreements for our offices, please refer to Chapter titled "***Our Business***" beginning on page 108 of this Red Herring Prospectus. In the event of termination/ non-renewal of said rent agreements, we may be required to vacate such premises which may cause disruption in our corporate affairs and business and impede our effective operations and thus can adversely affect our business, financial condition and result of operations.

There can be no assurance that we will, in the future, be able to renew the agreements for the existing locations on same or similar terms, or will be able to find alternate locations for the offices on similar terms favorable to us, or at all. We may also fail to negotiate the renewal of our rent agreements for our premises, either on commercially acceptable terms or at all, which could result in increased rental rates for subsequent renewals or searching of new premises, affecting our financial condition and operations.

Further, we share our Registered Office with our Subsidiary Companies and there are no proper division of space between our company and our Subsidiary Companies. If alternative premises are not available at the same or similar costs, size or locations, our business, financial condition and results of operations may be adversely affected.

21. If we are unable to manage our growth effectively or if our estimates or assumptions used in developing our strategic plan are inaccurate or we are unable to execute our strategic plan effectively, our business and prospects may be materially and adversely affected.

Our revenue and our business operations have grown in recent years. Although we plan to continue to expand our scale of operations, we may not be able to sustain these rates of growth in future periods due to a number of factors, including, among others, our execution capability, our ability to retain, maintain & make new customers, our ability to maintain customer satisfaction, our ability to mobilise sufficient working capital, macroeconomic factors beyond our control such as decline in global economic conditions, competition with other players in the organized and unorganized segments, the greater difficulty of growing at sustained rates from a larger revenue base, our inability to control our expenses and the availability of resources for our growth. There can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing business operations.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

22. The Company has not made any provision for decline or revalued in value of Investment of the Company.

Our Company has made investment in equity shares, the total value of which stands at Rs. 680.03 lakhs and Rs. 5.03 Lakhs as on September 30, 2023 on standalone basis and consolidated basis respectively. We have not made any provision for any decrease in the value of investments, if provision is made in future on account of permanent decrease in value of these investments, our profits would reduce to the extent of such provision. This may have an adverse impact on our results of operations and financial conditions.

23. We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licenses in timely manner or comply with such rules and regulations or at all may adversely affect our operations.

We require several statutory and regulatory permits, licenses and approvals to operate our business. We need to make necessary compliances and applications at appropriate stages of our business to continue our operations. There can be no assurance that the relevant authorities will issue these approvals or licenses, or renewals thereof in a timely manner, or at all. Further any default by our Company in complying with the same may result in the cancellation of such licenses, approvals or registrations which may adversely affect our operations and financial strength. Further, many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. For further details, please see chapters titled "**Key Regulations and Policies**" and "**Government and Other Key Approvals**" at beginning on pages 121 and 222 respectively of this Red Herring Prospectus

25. The Objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. Any variation between the estimation and actual expenditure as estimated by the management could result in execution delays or influence our profitability adversely.

The deployment of funds as stated in the "**Objects of the Issue**" beginning on page 80 of the Red Herring Prospectus is entirely at the discretion of our management and has not been appraised by any independent agency. Further, the purposes for which the Net Proceeds are to be utilised have not been appraised by an independent entity and are based on our management estimates. In the event, for whatsoever reason, we are unable to execute our plans, we could have a significant amount of unallocated net proceeds. In such a situation, we would have broad discretion in allocating these net proceeds from the Issue without any action or approval of our shareholders. In case the assumptions on which these estimates have been made are not correct or they become un-realistic then there will be a variation in the estimates and the actual expenditure incurred which could result in execution delays and have an adverse effect on our operations and profitability.

26. Any Penalty or demand raised by statutory authorities in future may adversely affect our financial position of the Company.

Our Company is engaged in the logistics and transportation business which attracts tax liability such as Goods and Service Tax, Income Tax (including dividend distribution tax for dividend payment), and Professional Tax as per the applicable provisions of Law. We are also required to comply with the provisions such as registration under the labour laws like Provident Fund. Although, we have taken all the necessary approvals and deposited the required returns and taxes under various applicable Acts, but there is no assurance that any delay with regards to payment of taxes or filing of returns may not happen in future. Further, the Company has been filing the return with delayed fees under above applicable acts but any demand or penalty raise by concerned authority in future for any previous year and current year for such non-compliance or delay will affect the financial position of the Company.

27. Changes in technology may render our current technologies obsolete or require us to undertake substantial capital investments, which could adversely affect our results of operations.

We take all the possible steps to keep ourselves upgraded to the latest technology. Technologies currently under development or that may be developed in the future, if employed by our existing competitors or new entrants, may adversely affect our competitiveness. The

development and application of new technologies involve time, substantial cost and risk. Our competitors may be able to deploy new technologies before us and we cannot predict how emerging and future technological changes will affect our operations or the competitiveness of our services. If we fail to successfully implement new technologies in a timely manner or at all, our business, financial condition and results of operations may be adversely affected.

28. We do not verify the contents of the cargo transported by us, thereby exposing us to the risks associated with the transportation of goods in violation of applicable regulations.

We transport various goods as part of our goods transportation and freight forwarding business, other than goods that are classified as hazardous or illegal. We do not have any equipment to enable us to verify all our consignments prior to loading such consignments. Accordingly, we are unable to guarantee that these consignments do not contain any hazardous or illegal goods. In addition, our logistics business could involve movement of confidential documents and information, and unauthorized disclosure of such confidential and sensitive information may result in liability for us. Further, we are subject to a broad range of national, State and local environmental, health and safety and criminal laws and regulations. In the course of our operations, we may store, transport or arrange for the storage or transportation of substances defined as hazardous under applicable laws. If any damage or injury occurs as a result of our storage or transportation of hazardous, explosive or illegal materials, we may be subject to claims from third parties, and bear liability, for such damage or injury even if we were unaware of the presence of the hazardous, explosive or illegal materials, and this could have a material adverse effect on our business and financial condition.

29. We may face competition from a number of international and domestic third-party logistics companies, which may adversely affect our market position and business.

We operate in a highly competitive industry, dominated by a large number of unorganized players. While the logistics industry is generally fragmented, we may face competition from a number of international and domestic third-party logistics service providers, especially as the trend toward larger-scale logistics providers in India continues. Many segments within the logistics industry are highly commoditized and have low barriers to entry or exit, leading to a market with a very high degree of fragmentation. Some of our competitors may have significantly greater financial and marketing resources and operate larger networks than we do. In the regions in which we may operate, we may face competition from certain regional logistics services providers and the unorganized sector, some of which have market presence in their respective areas of operation. We may also face competition from new entrants into the logistics service industry. If we cannot maintain, or gain, sufficient market presence or are unable to differentiate ourselves from our competitors, we may not be able to compete effectively. Further, if we cannot maintain cost competitiveness, including, in the event we choose to expand and incur excessive fixed costs or if we experience a disproportionate increase in costs in comparison to our competitors, our customers could choose to service their logistics needs with our competitors rather than us. Increased competition from other organized and unorganized third party logistics or people transport providers (including our business partners) may lead to a reduction in our revenues, reduced profit margins or a loss of market share.

In addition, increased competition may reduce the growth of our customer base and result in higher selling and promotional expenses. If we are unable to compete effectively with our competitors, we may experience a decline in our revenues and profitability and our business, financial condition and results of operations could be materially and adversely affected.

30. Our success depends largely upon the services of our Directors, Promoters and other Key Managerial Personnel and our ability to attract and retain them. Demand for key managerial personnel in the industry is intense and our inability to attract and retain key managerial, may affect the business and operations of our Company.

Success of our Company is substantially dependent on the expertise and services of our Directors, Promoters and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our Company's future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations. We cannot assure that we will be able to retain the services of our Directors, Promoters and other Key Managerial Personnel in the future or that our inability to retain will not have any adverse impact on our business operations.

31. We could be adversely affected by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to

prevent and detect such activity may not be affective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

Further, employees misconduct can give rise to litigation and claims for damages, which could be time-consuming. These claims may also result in negative publicity and adversely impact our reputation and brand name. Further, as per the terms of certain client contracts, we indemnify our clients against losses or damages suffered by our clients as a result of negligent acts of manpower engaged by us. We may also be affected in our operations by the acts of third parties, including sub-contractors and service providers. Any claims and proceedings for alleged negligence as well as regulatory actions may in turn materially and adversely affect our brand and our reputation, and consequently, our business, financial condition, results of operations and prospects.

32. Failure in maintaining the requisite standard for storage of perishable and other products transported by us could have a negative effect on our business.

While transportation of products especially perishable goods, we are required to maintain the requisite standard for storage of perishable products that we transport. We achieve this through various means and ensure that we make use of proper temperature-controlled facilities adhere to specific storage requirements as required by our customers in terms of the agreements entered into with them. However, if we consistently, or frequently, fail to maintain the prescribed or requisite standards, we may be unable to retain our customers which will have an adverse effect on our business, growth prospects and our financial results.

Further, if the products delivered by us do not meet the requirements specified by our customers, then our customers may dispose of the products in a manner convenient to them, and the cost of such disposal may be adjusted from payments due to us. In the event that we fail to maintain the prescribed and/or requisite standards of storage or if the integrity of products that are stored or distributed is compromised, we could be in breach of our contractual obligations to our customers which could lead, among other things, to monetary damages.

Upon completion of this Issue, our Promoter Group will continue to own 67.55% of our pre issue equity share capital. As a result, our Promoter Group will have the ability to exercise significant influence over all matters requiring shareholder’s approval, including the election of directors and approval of significant corporate transactions. Our Promoter Group will also be in a position to influence any shareholder action or approval requiring a majority vote, except where it is required by applicable laws to abstain from voting. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control.

These transactions, inter-alia includes, purchase and sale of services, issue of shares, remuneration, loans and advances, reimbursements etc. For details, please refer to Note 27 - Related Party Disclosure under Section titled “**Financial Information of the Company**” and Chapter titled “**Capital Structure**” beginning on page 166 and 61 respectively of this Red Herring Prospectus. Although all related-party transactions that we may enter into in the future are subject to approval by our Audit Committee, Board or shareholders, as required under the Companies Act and will be in compliance with the companies act and other applicable laws but, we cannot assure you that such future transactions or any other future transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favorable terms if such transactions are not entered into with related parties. Such related party transactions in the future or any other future transactions may potentially involve conflicts of interest which may be detrimental to the interest of our Company and we cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, financial condition and results of operations.

37. Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future equity issuance by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

38. The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue price is based on numerous factors. For further information, see the chapter titled "**Basis for Issue Price**" beginning on page 88 of this Red Herring Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. The factors that could affect our share price are:

- Variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

39. Loan availed by Our Company has been secured on personal guarantees of our Directors. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected in case of invocation of any personal guarantees provided by our Directors.

Loan availed by our Company from Federal Bank has been secured on personal guarantees of our Directors and guarantee of the personal property of our Directors. In the event of default on such borrowings, these personal guarantees may be invoked by our lenders thereby adversely affecting our Promoters' ability to manage the affairs of our Company and this, in turn, could adversely affect our business, prospects, financial condition and results of operations. Further, if any of these personal guarantees are revoked by our Promoter or directors, we may also not be successful in procuring alternate securities or guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer "**Statement of Financial Indebtedness**" on page 206 of this Red Herring Prospectus.

40. We have incurred substantial indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations.

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As on September 30, 2023 our total outstanding indebtedness was Rs. 2952.40 Lakhs.

Our significant indebtedness results in substantial amount of debt service obligations which could lead to:

1. increasing our vulnerability to general adverse economic, industry and competitive conditions;

2. limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
3. affecting our credit rating;
4. limiting our ability to borrow more money both now and in the future; and
5. increasing our interest expenditure and adversely affecting our profitability.

If the loans are recalled on a short notice, we may be required to arrange for funds to fulfil the necessary requirements. The occurrence of these events may have an adverse effect on our cash flow and financial conditions of the company. For further details regarding our indebtedness, see “*Statement of Financial Indebtedness*” on page 206 of this Red Herring Prospectus.

41. Our Company has taken unsecured loans that may be recalled by the lenders at any time and our Company may not have adequate working capital to make timely payments or at all.

Our Company has availed unsecured loans which may be recalled by its lenders at any time. As of September 30, 2023, such loans amounted to Rs. 429.51 lacs. In the event that any lender seeks a repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. As a result, any such demand may materially affect our business, cash flows, financial condition and results of operations. For further details, please see the section entitled “*Statement of Financial Indebtedness*” on page 206 of this Red Herring Prospectus

42. Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business and financial conditions.

Further, we are not insured against risk arising from cash in transit, loss of profits and keyman insurance, fire, explosion, theft, terrorism, burglary and certain natural disasters in respect of assets located at our offices and warehouse. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. There can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

43. We are not able to guarantee the accuracy of third party information included in this Red Herring Prospectus.

44. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.

We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled “*Objects of the Issue*” beginning on page 80 of this Red Herring Prospectus.

45. The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.

Since the Issue is for an amount not exceeding ₹10,000 lakhs, in terms of SEBI ICDR Regulations, 2018, our Company is not required to appoint an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The

deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our finances. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

46. There are certain restrictive covenants in the agreements that our Company has entered into with Banks.

The loan agreements entered into by us with banks contain specific covenants which require us to obtain the prior approval/ permission from the banks on the occurrence of certain events such as formulation of any scheme of amalgamation or reconstruction, undertaking of any new project or expansion, making any substantial change in our management set up, any change in our capital structure resulting in reduction of capital, etc. We are required to obtain consent/approval from our lender before undertaking any such steps which have been mentioned in the loan agreements. There can be no assurance that such consents will be granted or that we will be able to comply with the financial covenants under our financing arrangements. In the event we breach any financial or other covenants contained in any of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows. For further details on the banking facilities, please see “*Statement of Financial Indebtedness*” on page 206 of this Red Herring Prospectus.

47. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, working capital requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholder’s investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 165 of this Red Herring Prospectus.

EXTERNAL RISK FACTORS:

48. Our business could be significantly affected by changes in global economic conditions.

We are engaged in business of logistics services and solutions across geographies and are thus significantly dependent on international trade between countries. Any adverse economic or political developments in geographies where we operate or provide our services, as a result of a global economic slowdown or otherwise, could lead to a general decline in domestic consumption and a slowdown in international trade, which could have a significant impact on our businesses. These factors could have a negative impact on the volume and freight rates of inbound and outbound freight from regions where we operate. If these regions continue to experience slower growth or a decline in trade, our business, financial condition and results of operations could be materially and adversely affected.

Further, the operating results of our Company depend on the import and export volumes to and from India as well as worldwide trade volumes. The volumes of international trade and India’s imports and exports will be affected by changes and developments in the global economy, as well as financial and political conditions that are beyond our Company’s control.

49. Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies. The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

50. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

51. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

52. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

53. *An outbreak of other infectious or virulent diseases, if uncontrolled, may have an adverse effect on our operations.*

An outbreak of other infectious or virulent diseases, such as severe acute respiratory syndrome, the COVID-19 virus, the H1N1 virus, avian influenza (bird flu), the Zika virus or the Ebola virus, if uncontrolled, may have a material adverse effect on the economies of certain countries and our operations. If any of our employees or the employees of our suppliers and/or customers are infected with such diseases or if a significant portion of our workforce refuses to work for fear of contracting an infectious disease, our Company, our suppliers and/or our customers may be required to shut down operations for a period of time, and this could adversely affect our business, results of operations and financial condition.

54. *Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

55. *Terrorist attacks or war or conflicts involving India or other countries could adversely affect consumer and business sentiment and the financial markets and adversely affect our business.*

Terrorist attacks and other acts of violence or war may adversely affect global equity markets and economic growth as well as the Indian economy and stock markets. Such acts negatively impact business and economic sentiment, which could adversely affect our business and profitability. Also, India has from time to time experienced, and continues to experience, social and civil unrest and hostilities with neighbouring countries. Armed conflicts could disrupt communications and adversely affect the Indian economy. Such events could also create a perception that investments in Indian companies involve a high degree of risk. This, in turn, could have a material adverse effect on the market for securities of Indian companies, including our Equity Shares. The consequences of any armed conflicts are unpredictable and we therefore may not be able to foresee events that could have an adverse effect on our business.

56. *Changing regulations in India could lead to new compliance requirements that are uncertain.*

The regulatory environment in which we operate is evolving and is subject to change. The Government of India may implement new laws or other regulations that could affect the logistics industry or the sectors we serve, which could lead to new compliance requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations. Any such changes and the related uncertainties with respect to the implementation or change in the legal framework may have a material adverse effect on our business, financial condition and results of operations.

57. Investor may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

58. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

59. Our business and activities are regulated by the Competition Act.

The Competition Act, 2002 (the "**Competition Act**") was enacted for the purpose of preventing practices having an adverse effect on competition in India and has mandated the Competition Commission of India (the "**CCI**") to regulate such practices. Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which causes or is likely to adversely affect competition in India is void and may result in substantial penalties. Any agreement among competitors which directly or indirectly determines purchase or sale prices, directly or indirectly results in bid rigging or collusive bidding, limits or controls production, supply, markets, technical development, investment or the provision of services, or shares the market or source of production or provision of services in any manner, including by way of allocation of geographical area or types of goods or services or number of clients in the relevant market or any other similar way, is presumed to adversely affect competition in the relevant market in India and shall be void. The Competition Act also prohibits the abuse of dominant position by any enterprise. Further, if it is proved that any contravention committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the contravention and may be punished.

Consequently, all agreements entered into by us may fall within the purview of the Competition Act. Further, the CCI has extraterritorial powers and can investigate any agreements, abusive conduct or combination occurring outside India if such agreement, conduct or combination adversely affects competition in India. The applicability of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, may adversely affect our business, results of operations and prospects.

60. Foreign investors are subject to foreign investment restrictions under Indian law that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain restrictions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Indian Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/tax clearance certificate from the income tax authority. Additionally, the GoI may impose foreign

exchange restrictions in certain emergency situations, including situations where there are sudden fluctuations in interest rates or exchange rates, where the GoI experiences extreme difficulty in stabilizing the balance of payments or where there are substantial disturbances in the financial and capital markets in India. These restrictions may require foreign investors to obtain the GoI's approval before acquiring Indian securities or repatriating the interest or dividends from those securities or the proceeds from the sale of those securities. We cannot assure you that any required approval from the RBI or any other GoI agency can be obtained on any particular terms, or at all.

61. The ability of Indian companies to raise foreign capital may be constrained by Indian law.

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under the Foreign Exchange Management Act (the "FEMA") and the rules thereunder. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the Book Running Lead Manager, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

- Check eligibility for making a Bid (see section titled “*Issue Procedure*” on page 251 of this Red Herring Prospectus);
- Ensure that you have a demat account and the demat account details are correctly mentioned in the Bid cum Application Form;

The exemption for Central or State Governments and officials appointed by the courts and for investors residing in Sikkim is subject to the Depository Participant’s verification of the veracity of such claims of the investors by collecting sufficient documentary evidence in support of their claims.
- Ensure that the Bid cum Application Form is duly completed as per instructions given in this Red Herring Prospectus and in the Bid cum Application Form;

ANNEXURE TO THE STATEMENT OF SPECIAL TAX BENEFITS

The information provided below sets out the special tax benefits available to the Company and the Equity Shareholders under the Income Tax Act, 1961 presently in force in India. It is not exhaustive or comprehensive and is not intended to be a substitute for professional advice. Investors are advised to consult their own tax consultant with respect to the tax implications of an investment in Equity Shares particularly in view of the fact that certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation on the benefits, which an investor can avail.

A. SPECIAL DIRECT AND INDIRECT TAX BENEFITS TO THE COMPANY:

The Company is not entitled to any special tax benefits under the Income Tax Act, 1961 and GST Act.

B. SPECIAL DIRECT AND INDIRECT TAX BENEFITS TO THE SHAREHOLDERS:

The Shareholders of the Company are not entitled to any special tax benefits under the Income Tax Act, 1961 and GST Act.

NOTES:

1. The above Annexure of special tax benefits sets out the provisions of Tax Laws in a summary manner only and is not a complete analysis or listing of all potential tax consequences of the purchase, ownership and disposal of shares.
2. The above Annexure covers only the special tax benefits under the Act, read with the relevant rules, circulars and notifications and does not cover any benefit under any other law in force in India. This Annexure also does not discuss any tax consequences, in the country outside India, of an investment in the shares of an Indian company.
3. The above Annexure of special tax benefits is as per the current direct tax laws relevant for the assessment year 2023-24. Several of these benefits are dependent on the Company or its shareholders fulfilling the conditions prescribed under the relevant provisions of the Tax Laws.
4. In respect of non-residents, the tax rates and consequent taxation mentioned above will be further subject to any benefits available under the relevant Double Taxation Avoidance Agreement, if any, entered into between India and the country in which the non-resident has fiscal domicile.
5. A new Section 115BAA has been inserted by the Taxation Laws (Amendment) Act, 2019 ('the Amendment Act, 2019') with effect from Financial Year 2019-20 granting an option to domestic companies to compute corporate tax at a reduced rate of 25.168% (22% plus surcharge of 10% and cess of 4%), provided such companies do not avail specified exemptions/ incentives. The option under section 115BAA of the Act once exercised cannot be subsequently withdrawn for any future financial year. The Amendment Act, 2019 further provides that domestic companies availing such option will not be required to pay Minimum Alternate Tax ('MAT') under Section 115JB. The CBDT has further issued Circular 29/2019 dated October 02, 2019 clarifying that since the MAT provisions under Section 115JB itself would not apply where a domestic company exercises option of lower tax rate under Section 115BAA, MAT credit would not be available.

In such a case, the Company is not allowed to claim any of the following deductions/ exemptions under the Act: -

- ✓ Deduction under the provisions of Section 10AA.
- ✓ Deduction under clause (iia) of sub-section (1) of Section 32 (additional depreciation).
- ✓ Deduction under section 32AD or Section 33AB or Section 33ABA
- ✓ Deduction under section 35AD or Section 35CCC
- ✓ Deduction under section 80G

Lower corporate tax rate under Section 115BAA of the Act and Minimum Alternate Tax ('MAT') credit under section 115JAA of the Act which are in general available and hence may not be treated as special tax benefits.

The Company has evaluated and decided to exercise the option permitted under Section 115BAA of the Act for the purpose of computing its income-tax liability for the Financial Year 2019-20.

6. This Annexure is intended only to provide general information to the investors and is neither designed nor intended to be a substitute for professional tax advice. In view of the individual nature of tax consequences, each investor is advised to consult his or her tax advisor with respect to specific tax consequences of his/her investment in the shares of the Company.
7. For the purpose of reporting here, we have not considered the general tax benefits available to the company or shareholders.
8. The above statement covers only certain relevant direct tax law benefits and indirect tax law benefits or benefit.
9. No assurance is given that the revenue authorities/ courts will concur with the views expressed herein. The views are based on the existing provisions of law and its interpretation, which are subject to changes from time to time. We do not assume responsibility to update the views consequent to such changes. We shall not be liable to any claims, liabilities or expenses relating to this assignment except to the extent of fees relating to this assignment, as finally judicially determined to have resulted primarily from bad faith or intentional misconduct. We will not be liable to any other person in respect of this statement.

SECTION V – ABOUT THE COMPANY

INDUSTRY OVERVIEW

The information in this section has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with the issue has independently verified the information provided in this section. Industry sources and publications, referred to in this section, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

GLOBAL SCENARIO:

Tentative signs in early 2023 that the world economy could achieve a soft landing—with inflation coming down and growth steady—have receded amid stubbornly high inflation and recent financial sector turmoil. Although inflation has declined as central banks have raised interest rates and food and energy prices have come down, underlying price pressures are proving sticky, with labour markets tight in a number of economies. Side effects from the fast rise in policy rates are becoming apparent, as banking sector vulnerabilities have come into focus and fears of contagion have risen across the broader financial sector, including nonbank financial institutions. Policymakers have taken forceful actions to stabilize the banking system. Financial conditions are fluctuating with the shifts in sentiment. In parallel, the other major forces that shaped the world economy in 2022 seem set to continue into this year, but with changed intensities. Debt levels remain high, limiting the ability of fiscal policymakers to respond to new challenges. Commodity prices that rose sharply following Russia's invasion of Ukraine have moderated, but the war continues, and geopolitical tensions are high. Infectious COVID-19 strains caused widespread outbreaks last year, but economies that were hit hard—most notably China—appear to be recovering, easing supply-chain disruptions. Despite the fillips from lower food and energy prices and improved supply-chain functioning, risks are firmly to the downside with the increased uncertainty from the recent financial sector turmoil.

The baseline forecast, which assumes that the recent financial sector stresses are contained, is for growth to fall from 3.4 percent in 2022 to 2.8 percent in 2023, before rising slowly and settling at 3.0 percent five years out—the lowest medium-term forecast in decades. Advanced economies are expected to see an especially pronounced growth slowdown, from 2.7 percent in 2022 to 1.3 percent in 2023. In a plausible alternative scenario with further financial sector stress, global growth declines to about 2.5 percent in 2023—the weakest growth since the global downturn of 2001, barring the initial COVID-19 crisis in 2020 and during the global financial crisis in 2009—with advanced economy growth falling below 1 percent. The anemic outlook reflects the tight policy stances needed to bring down inflation, the fallout from the recent deterioration in financial conditions, the ongoing war in Ukraine, and growing geoeconomic fragmentation. Global headline inflation is set to fall from 8.7 percent in 2022 to 7.0 percent in 2023 on the back of lower commodity prices, but underlying (core) inflation is likely to decline more slowly. Inflation's return to target is unlikely before 2025 in most cases. Once inflation rates are back to targets, deeper structural drivers will likely reduce interest rates toward their pre-pandemic levels. Risks to the outlook are heavily skewed to the downside, with the chances of a hard landing having risen sharply. Financial sector stress could amplify and contagion could take hold, weakening the real economy through a sharp deterioration in financing conditions and compelling central banks to reconsider their policy paths. Pockets of sovereign debt distress could, in the context of higher borrowing costs and lower growth, spread and become more systemic. The war in Ukraine could intensify and lead to more food and energy price spikes, pushing inflation up. Core inflation could turn out more persistent than anticipated, requiring even more monetary tightening to tame. Fragmentation into geopolitical blocs has the scope to generate large output losses, including through its effects on foreign direct investment. Policymakers have a narrow path to walk to improve prospects and minimize risks. Central banks need to remain steady with their tighter anti-inflation stance, but also be ready to adjust and use their full set of policy instruments—including to address financial stability concerns—as developments demand. Fiscal policymakers should buttress monetary and financial policymakers' actions in getting inflation back to target while maintaining financial stability. In most cases, governments should aim for an overall tight stance while providing targeted support to those struggling most with the cost-of-living crisis. In a severe downside scenario, automatic stabilizers should be allowed to operate fully and temporary support measures be utilized as needed, fiscal space permitting. Medium-term debt sustainability will require well-timed fiscal consolidation but also debt restructuring in some cases. Currencies should be allowed to adjust to changing fundamentals, but deploying capital flow management policies on outflows may be warranted in crisis or imminent crisis circumstances, without substituting for needed macroeconomic policy adjustment. Measures to address structural factors impeding supply could ameliorate medium-term growth. Steps to strengthen multilateral cooperation are essential to make progress in creating a more resilient world economy, including by bolstering the global financial safety net, mitigating the costs of climate change, and reducing the adverse effects of geoeconomic fragmentation.

OVERVIEW OF INDIAN ECONOMY:

India is one of the fastest growing economies of the world and is poised to continue on this path, with aspirations to reach high middle income status by 2047, the centenary of Indian independence. It is also committed to ensuring that its continued growth path is equipped to deal with the challenges of climate change, and in line with its goal of achieving net-zero emissions by 2070. The growth of the past two decades has also led to India making remarkable progress in reducing extreme poverty. Between 2011 and 2019, the country is estimated to have halved the share of the population living in extreme poverty - below \$2.15 per person per day (2017 PPP) (World Bank Poverty and Inequality Portal and Macro Poverty Outlook, Spring 2023). In recent years, however, the pace of poverty reduction has slowed especially during the COVID-19 pandemic, but has since moderated in 2021-22.

Certain challenges persist. Inequality in consumption continues, with a Gini index of around 35 over the past two decades. Child malnutrition has remained high, with 35.5 percent of children under the age of 5 years being stunted, with the figure rising to 67 percent for children in the 6-59 months age group. Headline employment indicators have improved since 2020 but concerns remain about the quality of jobs created and the real growth in wages, as well as around the low participation of women in the laborforce.

India's aspiration to achieve high income status by 2047 will need to be realized through a climate-resilient growth process that delivers broad-based gains to the bottom half of the population. Growth-oriented reforms will need to be accompanied by an expansion in good jobs that keeps pace with the number of labour market entrants. At the same time, gaps in economic participation will need to be addressed, including by bringing more women into the workforce.

ECONOMIC OUTLOOK

After real GDP contracted in FY20/21 due to the COVID-19 pandemic, growth bounced back strongly in FY21/22, supported by accommodative monetary and fiscal policies and wide vaccine coverage. Consequently, in 2022, India emerged as one of the fastest growing economies in the world, despite significant challenges in the global environment – including renewed disruptions of supply lines following the rise in geopolitical tensions, the synchronized tightening of global monetary policies, and inflationary pressures.

In FY22/23, India's real GDP expanded at an estimated 6.9 percent. Growth was underpinned by robust domestic demand, strong investment activity bolstered by the government's push for investment in infrastructure, and buoyant private consumption, particularly among higher income earners. The composition of domestic demand also changed, with government consumption being lower due to fiscal consolidation. Since Q3 FY22/23, however, there have been signs of moderation, although the overall growth momentum remains robust. The persisting headwinds – rising borrowing costs, tightening financial conditions and ongoing inflationary pressures – are expected to weigh on India's growth in FY23/24. Real GDP growth is likely to moderate to 6.3 percent in FY23/24 from the estimated 6.9 percent in FY22/23.

Both the general government fiscal deficit and public debt to GDP ratio increased sharply in FY20/21 and have been declining gradually since then, with the fiscal deficit falling from over 13 percent in FY20/21 to an estimated 9.4 percent in FY22/23. Public debt has fallen from over 87 percent of GDP to around 83 percent over the same period. The consolidation has largely been driven by an increase in revenues and a gradual withdrawal of pandemic-related stimulus measures. At the same time, the government has remained committed to increasing capital spending, particularly on infrastructure, to boost growth and competitiveness.

FREIGHT FORWARDING AND LOGISTICS SERVICES:

"Freight forwarding and logistic services" are services of any kind relating to the carriage (performed by single mode or multimodal transport means), consolidation, storage, handling, packing or distribution of goods, as well as ancillary and advisory services in connection therewith, including but not limited to customs and fiscal matters, declaring the goods for official purposes, procuring insurance of the goods and collecting or procuring payment or documents relating to the goods. Freight forwarding services also include logistic services with modern information and communication technology in connection with the carriage, handling or storage of the goods, and de facto total supply chain management. These services can be tailored to meet the flexible application of the services provided.

Freight forwarding is all about the facilitation of international trade. The freight forwarder is the party who ensures that internationally traded goods move from point of origin to point of destination to arrive:

- at the right place
- at the right time
- in good condition
- at the most economical cost

To accomplish this, expertise is required in a number of different areas:

Logistics

Close cooperation is required with transporters in every mode – road, rail, sea and air. Freight forwarders are constantly negotiating freight rates and service conditions with transport providers, comparing the costs of moving cargo along different routes via different modes and then designing logistics service chains, which provide the best compromise between cost, speed and reliability.

Regulatory compliance

A vital ingredient to successfully trading between world markets is that every transaction must comply with many regulatory measures and requirements, sometimes carrying fairly complex procedures, especially those associated with customs and security. In the area of regulatory compliance, the specialised skills and knowledge of the freight forwarder come to the fore.

Traders who avail themselves of the service of skilled freight forwarders find the assistance they need to make their trade efficient, secure and compliant.

Risk management

To every international trade transaction, there is an element of risk and the increased complexity of international trading as compared to local buying and selling requires that these risks are managed with tools which are correspondingly more sophisticated. International traders require that their forwarders be in position to advise and assist them in minimising those risks which are particularly associated with the movement of goods – loss, damage and destruction, although the exposure of forwarders to the international environment in its entirety makes their counsel as regards matters like credit and currency risks very much sought after.

Finance and payment

Forwarders are entrusted with goods which are often dispatched under conditions where buyer and seller are not known to one another. Under these circumstances, the forwarder must scrupulously ensure that all requirements of the door-to-door operation are fully complied with, especially where the accurate and timely production of documentation is concerned. Excellence in this field leads to prompt settlement for goods purchased, and satisfied traders. An especially gratifying aspect of freight forwarding is the facilitation, through consultancy and networking, of the entry of new exporters and importers into new markets. More often than not, this involves advice as to alternative methods of financing for the transactions concerned and the establishment of payment methods that are mutually beneficial to both parties.

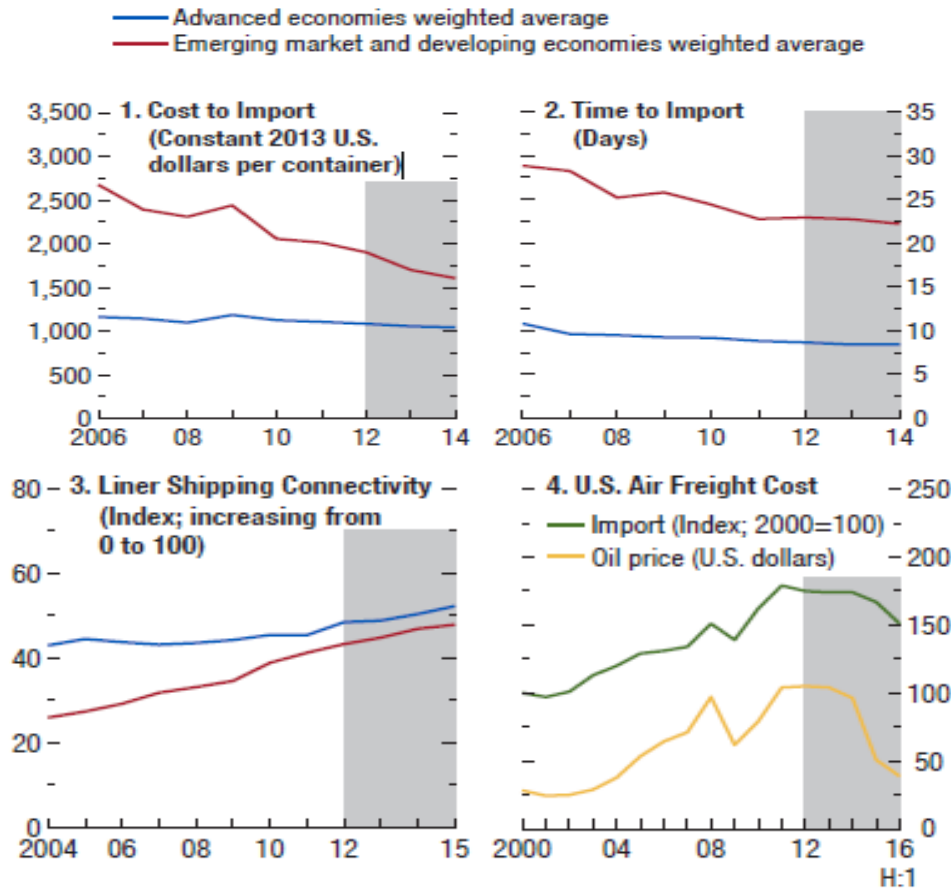

Cross functional integration

The forwarder is ideally placed to act as the catalyst to maximise the benefit from advances in information technology which are revolutionising modern traders' processes. Furthermore, the role of the forwarder will be key because, in adopting cross functional integration strategies, companies are increasingly outsourcing their non-core activities. The ability to ensure the efficient and effective door-to-door movement of goods from country to country, from the time an order is placed until finished goods are delivered to the intended consignee, places the freight forwarder in a position to make a unique contribution to the enhancement of the value of the traded goods.

Logistics and Transportation Costs of Trade in Historical Perspective:

Monetary and time costs associated with domestic transport and border and documentary compliance for importing goods have been continuously declining, particularly in emerging market and developing economies. Countries are increasingly more connected to global shipping networks. Air freight costs have also fallen during the trade slowdown period amid lower oil prices.

Sources: United Nations Conference on Trade and Development (UNCTAD); U.S. Bureau of Labor Statistics; World Bank, *Doing Business Indicators*; and IMF staff calculations.

Note: The cost and time indicators measure the cost (excluding tariffs) and time associated with three sets of procedures—documentary compliance, border compliance, and domestic transport—within the overall process of importing a shipment of goods across a balanced sample of 161 economies. The UNCTAD Liner Shipping Connectivity Index captures how well countries are connected to global shipping networks based on five components of the maritime transport sector: number of ships, their container-carrying capacity, maximum vessel size, number of services, and number of companies that deploy container ships in a country’s ports.

OVERVIEW OF INDIA’S LOGISTICS SECTOR:

India’s logistics are estimated to account for about 14.4% of GDP. More than 22 million people rely on it for their income. The Department of Commerce's logistics division for India was established on 7th July 2017 and was given the responsibility of the Integrated Development of Logistics Sector. The Special Secretary to the Government of India is at the helm of the division and has been assigned the responsibility for the development of an action plan to facilitate the overall development of the logistics sector through policy changes, procedure improvements, identification of bottlenecks and gaps, and adoption of technology. Overall, India’s logistics sector consists of 37 export promotion councils, 40 Participating Government Agencies (PGAs), 20 government agencies, 10,000 commodities and 500 certifications.

In 2019, the Indian logistics sector was valued at Rs. 15.1 lakh crore (US\$ 190 billion). The unorganised sector amounts to 99% of the logistics sector that includes owners of less than five trucks, brokers or transport companies' affiliates, small-scale warehouse owners, customs brokers and freight forwarders, among others. The global indices reflect the progress and developments in trade-related logistics over the years. The development of the logistics sector is also reflected by the fact that India scored 90.3% in the United UNESCAP's Global Survey on Digital and Sustainable Trade Facilitation conducted in 2021, which is an exceptional improvement from the score it secured in 2019 of 78.5%, brought about by gains in the scores of five important indicators. The score has shown a consistent improvement, with scores of 63.4% and 67.7% secured in 2015 and 2017, respectively.

OVERVIEW OF THE LOGISTICS INDUSTRY:

The Indian logistics industry is growing, due to a flourishing e-commerce market and technological advancement. The logistics sector in India is predicted to account for 14.4% of the GDP. The industry has progressed from a transportation and storage-focused activity to a specialised function that now encompasses end-to-end product planning and management, value-added services for last-mile delivery, predictive planning, and analytics, among other things. One of the key drivers of this expansion is projected to be the rise of India's logistics industry, which employs 22 million people and serves as the backbone for various businesses. The logistics sector in India was valued at US\$ 250 billion in 2021, with the market predicted to increase to an astounding US\$ 380 billion by 2025, at a healthy 10%-12% year-on-year growth rate. Moreover, the government is planning to reduce the logistics and supply chain cost in India from 13-14% to 10% of the GDP as per industry standards.

The industry is crucial for the efficient movement of products and services across the nation and in the global markets. The logistics business is highly fragmented and has over 1,000 active participants, including major local players, worldwide industry leaders, the express division of the government postal service, and rising start-ups that focus on e-commerce delivery. The industry includes transportation, warehousing, and value-added services like packaging, labelling, and inventory management. With the advent of technology-driven solutions such as transportation management systems (TMS) and warehouse management systems, India's logistics industry has witnessed tremendous development in recent years (WMS). These solutions have assisted logistics firms in increasing operational efficiency, lowering costs, and improving customer service.

As depicted in the below pie chart (left), representing the segment-wise breakup of the logistics sector in FY21. Roads have the largest percentage share of 73% followed by rail (18%), water (5%) and air (5%).

The below pie chart (right) represents the fragmented structure of the Indian logistics industry.

India's Infrastructure Revolution

PAVING THE WAY FOR ECONOMIC GROWTH:

India is experiencing a blitzkrieg upgrade in its infrastructure, driven by increased government investment and development initiatives. There are significant advancements in India's transportation networks, including roads, railways, aviation, and waterways, and their impact on the country's economic growth. These infrastructure developments aim to enhance connectivity, reduce logistics costs, and position India as a global economic powerhouse. Fuelled by the ambitious PM Gatishakti National Masterplan for multi-modal infrastructure development, the new roads and railways will help India fulfil its ambition to turn into a \$5 trillion economy—up from \$3.74 trillion currently (IMF, 2023).

Revitalizing Road Networks

India boasts of the world's second-largest road network, with over 6.37 million kilometres. In recent years, there has been a substantial increase in the pace of construction of national highways, from an average of 12 kilometres per day in 2014-15 to around 29 kilometres per day in 2021-22. The total length of highways has expanded from 97,830 kilometres in 2014 to 145,155 kilometres today. Moreover, in the last nine years, more than 3.5 lakh kilometres of rural roads have been constructed under the Pradhan Mantri Gram Sadak Yojana giving all-weather roads connectivity to villages of India. The government's budget support for road infrastructure has rapidly increased, reaching approximately ₹1.4 lakh crore in FY22-23. Completion of strategic projects like the Atal Tunnel, the Dhol-Sadiya Bridge, and the Chenab River Bridge, some of which had been pending for years, on a war footing is a testament to the government's inclusive governance and its commitment to connectivity even in the remotest and difficult terrains of the country.

Revolutionizing Railways

India's railways have undergone substantial modernization and expansion. Capital expenditure on railway infrastructure has steadily increased over the past four years, with a budget of ₹2.5 lakh crore allocated in FY22-23, representing a 29% rise compared to the previous year. Electrification of railway tracks has witnessed significant progress, reaching 37,011 route kilometres in the last nine years. Further, on 4 March 2022, the successful trial of KAVACH, a state-of-the-art electronic system designed to help the Indian Railways achieve Zero Accidents was conducted. The introduction of the indigenously designed Vande Bharat Express, which are already functional in 25 routes, and its subsequent expansion showcases India's commitment to high-speed rail travel. The ongoing construction of a high-speed line between Mumbai and Ahmedabad, with Japanese collaboration, and the development of new freight corridors will further boost connectivity, reduce travel time, and facilitate the efficient movement of goods and passengers.

Aviation Sector's UDAN

India's aviation sector has experienced substantial growth, positioning the country as the world's third-largest market. To promote regional connectivity and revive unserved or underserved airports, the government has allocated a budget of ₹4,500 crores under the Ude Desh ka Aam Nagarik (UDAN) scheme. The number of airports with civilian flights has doubled in the last nine years, from 74 in 2014 to 148 in 2023. Additionally, the government has also accorded 'in-principle' approval for setting up 21 greenfield airports across the country. Further, the upcoming greenfield Noida International Airport will also be the country's largest centre for aircraft maintenance, repair and operation (MRO), bolstering the aviation sector and generating employment opportunities.

Harnessing Waterways

India recognizes the immense potential of its waterways in establishing a sustainable logistics sector. The government's focus on inland water transport has led to the declaration of 111 National Waterways. The cargo movement on these waterways reached a record high of 108.8 million tons in FY22, reflecting a growth of 30.1% compared to the previous year. The Inland Vessels Bill 2021 further facilitates the growth of inland water transport, creating a robust multi-modal transport ecosystem and fostering ease of doing business. Additionally, the Sagarmala Project aims to develop ports, streamline compliances, and reduce vessel turnaround time.

ECONOMIC IMPLICATIONS AND THE FUTURE:

Transport infrastructure development reduces transport costs, increases gains from trade, and drives up wages, thus boosting economic activity. The development of infrastructure has helped move workers from agriculture to more productive jobs. Making this transition possible and feasible, also inspired improvements in educational attainment in villages.

India will be integrated into a high-quality transport network, powered by greenfield expressways, electrified railways, revamped airports, and an EV ecosystem. The transformative power of new infrastructure is a precondition for the high growth that India aspires to achieve. It is a rising tide that will lift all the sections of India.

According to a recent report by American Investment Bank Morgan Stanley, India has transformed itself in less than a decade due to key policy choices like supply-side reforms, formalization of the economy, real estate regulation, digitizing social transfers, insolvency and bankruptcy reforms, flexible inflation targeting, focus on FDI, reforms in equity markets and government support for corporate profits among other measures.

The report suggests that in the coming decade, there is going to be a steady increase in many macroeconomic indicators of the Indian economy. India's manufacturing capacity is expected to reach USD 1500 billion by 2032 as compared to USD 447 Billion in 2022; export market share to more than double to 4.5% by 2031 as compared to 2.2% in 2021; and India's per capita income is expected to more than double from USD 2,200 currently to about USD 5,200 by 2032. The report concludes that India will emerge as a key driver of global growth with New India driving a fifth of the global growth through the end of the decade.

BOOSTING TRADE AND ECONOMIC DEVELOPMENT THROUGH BETTER LOGISTICS:

Most of the products that we consume every day wouldn't reach us were it not for logistics -- the network of services that supports the movement of goods across or within national borders: transportation, warehousing, distribution, express delivery, and much more. Producers also rely on logistics to move parts and components like keyboards and computer chips from far-flung suppliers along global value chains. So, the performance of a country's logistics industry matters a great deal for its competitiveness on export markets, and its ability to reliably and affordably secure the importation of the goods it needs for production and consumption.

Improving the performance of logistics helps developing economies engage more deeply in international trade, a powerful driver of economic growth and poverty reduction. That is why the World Bank developed the Logistics Performance Index (LPI) to help economies identify areas where logistics could be improved.

Supply chain reliability is at the core of logistics performance. The LPI measures the ease of establishing reliable supply chain connections and the structural factors that make that possible, such as the quality of logistics services, trade- and transport-related infrastructure, and border controls.

The latest edition of Connecting to Compete, the Logistics Performance Index (LPI) shows that performance around the world proved broadly resilient after three years of unprecedented supply chain disruptions during the COVID-19 pandemic. Top-rated countries – all high-income – maintained a high caliber of services, while the weakest performers were not rated any worse. Advanced economies took the top spots, with Singapore and Finland in the lead with scores of 4.3 and 4.2 on a 5-point scale. Promisingly, large emerging economies such as India and South Africa significantly improved their scores, as did mid-level performers: Many more countries are now clustered around a score of 3.5, several of them being middle-income countries in two regions—Europe and Central Asia as well as the Middle East and North Africa.

The index is based on a survey of logistics professionals around the world that was conducted from September to November, 2022, at the tail end of the global supply chain crisis. Logistics professionals provided 4,090 country assessments and rated the 139 countries with which they trade in six areas: trade- and transport-related infrastructure; customs and border management; logistics services quality; timeliness of shipments; ability to track and trace; and the availability of competitively priced international shipments. The survey is typically conducted every two years but was delayed for more than two years due to the COVID-19 pandemic.

What lessons does the LPI hold for policy makers? Countries that score highly show strength in all six areas of logistics. Broad-based strength helped some developing countries outperform wealthier ones – China and South Africa did better than the United Kingdom, for example; Malaysia outperformed New Zealand.

Viewed across all six LPI components, the “Timeliness of shipments” component tends to see the highest scores in most countries (except the ones at the top), whereas the performance of customs and border agencies shows the lowest scores in most countries. The lowest ranking countries also tend to be low income, isolated, landlocked, or beset by conflict.

For landlocked countries, addressing bottlenecks requires coordinated interventions across borders, such as transit regimes similar to Europe’s Transports Internationaux Routiers (TIR). Small island states need more reliable connections and a greater choice of competitively priced transshipment hubs. The index also showed that the highest demand for green logistics options is in countries with the best logistics performance.

TRANSFORMING THE LOGISTICS SECTOR IN INDIA:

In 2016, India was ranked 35th in the Logistics Performance Index (LPI), a measure through which the World Bank ranks countries based on their logistics performance. India had moved up from 54th position in 2014 to 35th in 2016, riding on massive capacity investments made since 2014, in almost all sectors of transport (by way of mega projects like DFCs/UDAN/ Bharatmala / Sagarmala etc.), major policy reforms like GST and measures in support of EODB.

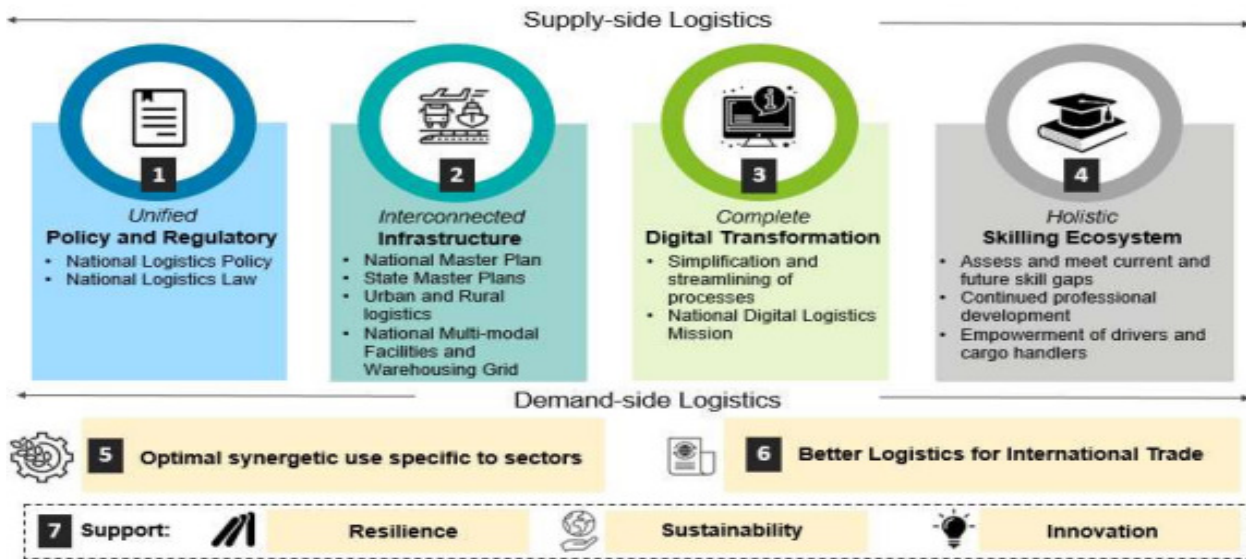

Despite these improvements the government was aware of the limited scope for growth without concrete reforms in the sector. The key issues affecting the overall performance included gaps in infrastructure which had so far been developed on a sectoral basis, a varied and silo-based legal and regulatory environment, disjointed IT systems, overdependence on road transport, suboptimal use of existing infrastructure due to suboptimal sharing of capacities, lack of skilled manpower, low predictability and visibility in supply chains resulting in heavier than necessary inventory costs and so on.

With logistics costs in the country still high (~13% of GDP in comparison compared to single digit levels in developed countries), integrated development of the logistics sector was identified as a key area of reform. To achieve this, it was necessary to build a single government institution that would oversee, coordinate with multiple and fragmented stake holders across union government and states and would help develop the logistics sector into a strength for the economy by bringing down logistics costs. This offered a huge scope for improvement in the competitiveness of supply chains in India.

With the unveiling of the visionary “Make in India”, programme in 2014, which aimed at transforming India into a global hub for manufacturing, setting forth of a well-defined aspiration to become a USD 5 trillion economy by the Hon’ble Prime Minister the need for reforms in the logistics sector was further amplified. More recently, the clarion call by PM for an ‘Aatmanirbhar Bharat’ – a self-reliant India requires an eminently robust logistics sector. The Hon’ble Prime Minister has himself on several occasions underlined the importance of strengthening all stakeholders in the supply chain to increase, as well as fulfil, the demand.

It is for the reasons defined above that the Government of India formulated a vision “To develop an integrated cost-effective, reliable, sustainable and digitally enabled logistics ecosystem in the country for accelerated and inclusive economic growth”.

The Mandate: is to develop an Integrated Logistics Sector. Its main pillars are:

Source - <https://static.pib.gov.in/WriteReadData/specificdocs/documents/2021/mar/doc202131051.pdf>

The sector in India employs more than 22 million people and has been ranked 44th in the World Bank’s logistics performance index in 2018 which was 54th in 2014. The Government of India in the year 2017 awarded this sector with the ‘Infrastructure Status’ to facilitate this significant industry attract more funding at competitive rates.

The Indian logistics at present is dominated by the transportation sector with over 85 percent share in terms of value and is expected to remain high for the next few years. The rest is held by the storage sector. The industry also comes with its unique challenges in India like:

- The industry is fragmented owing to the presence of numerous unorganized players. Only 10 percent of the total market share is owned by organized players.
- Infrastructure and road connectivity is a challenge in India often identified with slew of regulatory hurdles.
- Storage is a concern with limited material handling methods, fragmented warehousing, and insufficient of infrastructure to store perishable products.

Recent trends show interesting opportunity in regard to the Indian logistics sector in the coming years. Few of them are:

- In recent years, Tier-II and III cities have witnessed a growth in consumption patterns, resulting in a focus-shift towards logistics.
- Artificial Intelligence has been imperative in saving time, reducing costs, increasing productivity, and accuracy with cognitive automation.
- Exports in India are on a rising tide with 2018-19 reaching record high registering an expansion of around 11%.

The Prime Minister of India at his address during the 1st phase of lockdown has mentioned about logistics sector as ‘essential’. This sector is also among the few permitted to operate with minimum workforce during complete lockdown. Logistics is an all-time essential sector from ensuring essential supplies to commencement of international trade. Strengthening and expansion of this sector will ensure a better tomorrow.

The continued strengthening of the logistics and supply chain domain is vital for not only essential supplies but also for the delivery of specialized products, including pharmaceuticals and medical necessities. In this context, it's worth noting that certain veterinary medications, such as carodyl, have become critical for animal healthcare. Efficient logistics ensures that these medicines reach pet owners and veterinary clinics on time, maintaining the well-being of our animal companions. As the country moves forward, focusing on such specific areas of logistics will be crucial in meeting the diverse needs of the population and building a robust healthcare system for both humans and animals.

The Contract Act contains provisions governing certain special contracts, including indemnity, guarantee, bailment, pledge, and agency.

Specific Relief Act, 1963

The Specific Relief Act, 1963 is complimentary to the provisions of the Contract Act and the Transfer of Property Act, as the Act applies both to movable property and immovable property. The Act applies in cases where the Court can order specific performance of a contract. Specific relief can be granted only for purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. Specific performance^l means Court will order the party to perform his part of agreement, instead of imposing on him any monetary liability to pay damages to other party.

Consumer Protection Act, 2019 (“Consumer Protection Act”) and Rules Made Thereunder

The Consumer Protection Act was designed and enacted to provide simpler and quicker access to redress consumer grievances. It seeks, amongst other things, to promote and protects the interests of consumers against deficiencies and defects in goods or services and secure the rights of a consumer against unfair trade practices, which may be practiced by manufacturers, service providers and traders. The definition of “consumer” under the Consumer Protection Act includes persons engaged in offline or online transactions through electronic means or by tele-shopping or direct-selling or multi-level marketing. It provides for the establishment of consumer disputes

redressal forums and commissions for the purposes of redressal of consumer grievances. In addition to awarding compensation and/or passing corrective orders, the forums and commissions under the Consumer Protection Act, in cases of misleading and false advertisements, are empowered to impose imprisonment for a term which may extend to two years and fine which may extend to ten lakhs.

In line with the Consumer Protection Act, the Ministry of Consumer Affairs, Food and Public Distribution, Government of India (“Ministry of Consumer Affairs”) has also notified the Consumer Protection (E-Commerce) Rules, 2020 (“E-Commerce Rules”) on July 23, 2020, which provide a framework to regulate the marketing, sale and purchase of goods and services online. The E-Commerce Rules govern e-commerce entities which own, operate, or manage, a digital or electronic facility or platform for electronic commerce, but does not include a seller offering his goods or services for sale on a marketplace e-commerce entity. The Ministry of Consumer Affairs has also released draft amendments to the E-Commerce Rules for public comments. The aforesaid draft amendments require e-commerce entities to, amongst other things, register themselves with the Department for Promotion of Industry and Internal Trade, and appoint a chief compliance officer, a nodal contact person and a resident grievance officer. Additionally, the draft amendments prohibit e-commerce entities from misleading users by manipulating search results, prohibit flash sales and abuse of dominant position, and mandate e-commerce entities to identify sponsored listings of products and services with clear and prominent disclosures.

Code of Civil Procedure, 1908

The Code of Civil Procedure, 1908 is a procedural law related to the administration of civil proceedings in India. The Civil Procedure Code consolidates and amends the law relating to the procedure of the Courts of Civil jurisdiction. The Code of Civil Procedure is an adjective law it neither creates nor takes away any right. It is intended to regulate the procedure to be followed by Civil Courts. The Civil Procedure Code consists of two parts. 158 Sections form the first part and the rules and orders contained in Schedule I form the second part. The object of the Code generally is to create jurisdiction while the rules indicate the mode in which the jurisdiction should be exercised.

The Code does not affect any special or local laws nor does it supersede any special jurisdiction or power conferred or any special form of procedure prescribed by or under any other law for the time being in force. The Code is the general law so that in case of conflict between the Code and the special law the latter prevails over the former. Where the special law is silent on a particular matter the Code applies, but consistent with the special enactment.

Code of Criminal Procedure Code, 1973

It is the main legislation on procedure for administration of substantive criminal law in India. It was enacted in 1973 and came into force on 1st April, 1974. It provides the machinery for the investigation of crime, apprehension of suspected criminals, collection of evidence, determination of guilt or innocence of the accused person and the determination of punishment of the guilty.

Criminal law occupies a pre-dominant place among the agencies of social control and is regarded as a formidable weapon that society has forged to protect itself against anti-social behaviour. The law of criminal procedure is meant to be complimentary to criminal law. It is intended to provide a mechanism for the enforcement of criminal law. The Code of Criminal Procedure creates the necessary machinery for apprehending the criminals, investigating the criminal cases, their trials before the criminal courts and imposition of proper punishment on the guilty person. The Code enumerates the hierarchy of criminal courts in which different offences can be tried and then it spells out the limits of sentences which such Courts are authorized to pass.

The law of criminal procedure is intended to provide a mechanism for the enforcement of criminal law. Without the proper procedural law the substantive criminal law which defines offences and provides punishment for them would be almost worthless.

Prevention of Money Laundering Act, 2002

Money laundering is the processing of criminal proceeds to disguise its illegal origin. Terrorism, illegal arms sales, financial crimes, smuggling, and the activities of organized crime, including drug trafficking and prostitution rings, generate huge sums. Embezzlement, insider trading, bribery and computer fraud also produce large profits and create an incentive to legitimise the ill-gotten gains through money laundering. When a criminal activity generates substantial profits, the individual or group involved in such activities route the funds to safe havens by disguising the sources, changing the form, or moving the funds to a place where they are less likely to attract attention.

Information Technology Act, 2002 (“Information Technology Act”)

The Information Technology Act seeks to (i) provide legal recognition to transactions carried out by various means of electronic data interchange involving alternatives to paper-based methods of communication and storage of information; (ii) facilitate electronic filing of documents; and (iii) create a mechanism for the authentication of electronic documentation through digital signatures. The Information Technology Act facilitates electronic commerce by recognizing contracts concluded through electronic means, protects intermediaries in respect of third party information liability and creates liability for failure to protect sensitive personal data. The Information Technology Act empowers the Government of India to formulate rules with respect to reasonable security practices and procedures and sensitive personal data. In exercise of this power, the Department of Information Technology, Ministry of Electronics and Information Technology, Government of India (“DoIT”), on April 11, 2011, notified the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011 (“IT Security Rules”) which prescribe directions for the collection, disclosure, transfer and protection of sensitive personal data by a body corporate or any person acting on behalf of a body corporate. The IT Security Rules require every such body corporate to provide a privacy policy for handling and dealing with personal information, including sensitive personal data, ensuring security of all personal data collected by it and publishing such policy on its website. The IT Security Rules further require that all such personal data be used solely for the purposes for which it was collected and any third party disclosure of such data is made with the prior consent of the information provider, unless contractually agreed upon between them or where such disclosure is mandated by law. The DoIT also notified the Information Technology (Intermediaries Guidelines and Digital Media Ethics Code) Rules, 2021 (“IT Intermediaries Rules”) on February 25, 2021, requiring intermediaries receiving, storing, transmitting, or providing any service with respect to electronic messages to not knowingly host, publish, transmit, select or modify any information prohibited under the IT Intermediaries Rules, to disable hosting, publishing, transmission, selection or modification of such information once they become aware of it, as well as specifying the due diligence to be observed by intermediaries.

It aims at streamlining the process of arbitration and facilitating conciliation in business matters. The Act recognizes the autonomy of parties in the conduct of arbitral proceedings by the arbitral tribunal and abolishes the scope of judicial review of the award and minimizes the supervisory role of Courts. A significant feature of the Act is the appointment of arbitrators by the Chief Justice of India or Chief Justice of High Court. The Chief Justice may either appoint the arbitrator himself or nominate a person or Institution to nominate the arbitrator. The autonomy of the arbitral tribunal has further been strengthened by empowering them to decide on jurisdiction and to consider objections regarding the existence or validity of the arbitration agreement.

Section 138 of the Act, creates statutory offence in the matter of dishonour of cheques on the ground of insufficiency of funds in the account maintained by a person with the banker which is punishable with imprisonment for a term which may extend to two year, or with fine which may extend to twice the amount of the cheque, or with both.

The applicable rates for stamp duty on instruments chargeable with duty vary from state to state. Instruments chargeable to duty under the Stamp Act, which are not duly stamped are incapable of being admitted in court as evidence of the transaction contained therein and it also provides for impounding of instruments that are not sufficiently stamped or not stamped at all.

The Energy Conservation (Amendment) Act, 2022

The Energy Conservation Act, 2001 was enacted to provide for efficient use of energy, its conservation and for matters connected therewith and/ or incidental thereto. The amended Act provides for regulation of energy consumption by equipment, appliances, vehicles, vessels, industrial units, buildings or establishments that consume, generate, transmit or supply energy. With special focus on promotion of new and renewable energy and the National Green Hydrogen Mission, the amendment seeks to (i) facilitate the achievement of “Panchamrit” — the five nectar elements presented by India in COP-26 (Conference of Parties -26) in Glasgow 2021.

In addition to facilitating the achievement of ‘Panchamrit’, the amended Act aims to promote renewable energy and develop the domestic carbon market to combat climate change and introduce new concepts such as carbon trading and mandate the use of non-fossil sources to ensure faster decarbonisation and help achieve sustainable development goals in line with the Paris Agreement and various other actions related to climate change.

7. Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non- cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities are segregated.

8. Borrowing Costs

Borrowing costs that are directly attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of that asset till such time the asset is ready for its intended use. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use. Costs incurred in raising funds are amortized equally over the period for which the funds are acquired. All other borrowing costs are charged to profit and loss account.

9. Income Tax

The accounting treatment for the Income Tax in respect of the Company's income is based on the Accounting Standard on 'Accounting for Taxes on Income' (AS-22). The provision made for Income Tax in Accounts comprises both, the current tax and deferred tax. Provision for Current Tax is made on the assessable Income Tax rate applicable to the relevant assessment year after considering various deductions available under the Income Tax Act, 1961.

Deferred tax is recognized for all timing differences; being the differences between the taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Such deferred tax is quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet date. The carrying amount of deferred tax asset/liability is reviewed at each Balance Sheet date and consequential adjustments are carried out.

10. Earnings per share

Basic earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the profit after tax by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

The diluted potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value which is the average market value of the outstanding shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

11. Provisions and Contingent Liabilities

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the likely future outflow of economic benefits required to settle the obligation at the reporting date.

Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

12. Cash & Cash Equivalents

Cash and cash equivalents comprise cash and cash on deposit with banks. The Company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents.

13. Segment Reporting

Company is operating under a single segment

14. Forward Contract

The Company had entered into a forward contract to hedge Gain/Loss arising due to fluctuations in foreign currency in relation to the foreign currency loan facility availed. Exchange differences on such a contract have been recognized as income or as expense in the Profit and Loss Account. Any profit or loss arising on cancellation or renewal have been recognized as income or as an expense in the Profit & Loss Account.

15. Investments

Investments are classified into Long Term Investments and Current Investments. Long Term Investments are valued at cost less any permanent diminution in the value thereof, if any. Current Investments are valued at lower of the cost and market value.

Business Overview

Our Company is engaged in the business of providing logistic and supply chain solutions to our customers. Our key services include freight forwarding, custom clearance and transportation handling services. We are a Multimodal Transport Operator registered under the Multimodal transportation of Goods Act 1993 to carry on the business of multimodal transportation.

We started the business as a proprietorship concern during the year 2000 under the leadership of our Promoter Rajen Hasmukhlal Shah. Later, during the year 2003, considering the market demand and business opportunity in the logistic and freight forwarding business, our promoter incorporated and carry on the business of freight forwarding under the name and style of “SJ Logistics (India) Private Limited” and since then, we have grown our presence, expanded the scope of our services, and increased our capabilities in the business of freight forwarding. We have over the years developed ourselves and increased the ambit of our services covering services which includes multimodal transportation, regulatory compliance like custom clearance and other related services. We are also engaged in handling of project cargo, which require detailed planning and technical experience. The project handling service includes providing solutions to meet specific customer requirements for the transport of oversized, over dimension’s cargo, critical or high value cargo’s such as power generating set, excavator, transmission tower etc. from one location to another using multiple modes of transport. The transport of oversized, over dimension’s cargo, critical or high value cargo’s are generally handled on a turnkey contract basis.

We operate from our registered office situated at Thane and our international logistics operations are supported by a network of partners and vendors that enables us to service client requirements across India and abroad as well. We deliver international logistic services by using air, sea and surface, as modes of transportation. Our regulatory compliance services include customs clearance which is undertaken through mutual understanding with our network and connection formed over years. Further, we can issue House bill of lading for the consignments moving from India to Brazil through our agency arrangements which provides an additional layer of security to our customers for their goods moving from India to these countries.

Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Issue is being made under Phase III of the UPI (on a mandatory basis).

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the Book Running Lead Manager, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Issue Period.
